- E. SESSION SUMMARY:

The target is associated with high tech "stuff"; the discussions deal with extremely sophisticated technology. A military is somehow involved.

There is the sense that this technology is associated with aircraft in some way, either directly (the aircraft itself or parts thereof) or indirectly (extraneous aspects outside of, but relating to, aircraft).

A group of five individuals will have, or have had, a discussion revolved around 1) the contents of a long, oblong box (see sketch) and either an aircraft or a piece of an aircraft (see sketch). This group is in a place where there have been numerous small cylinders (like miniature scuba tanks) stored. This place is a small office/lab type area contained within a larger structure. This structure is reminiscent of a warehouse or maintenance facility. Somehow there is the concept of a "chinese" association here, whether it's governmental, genetics (i.e. someone of Chinese descent, personal religious philosophy; I don't know.

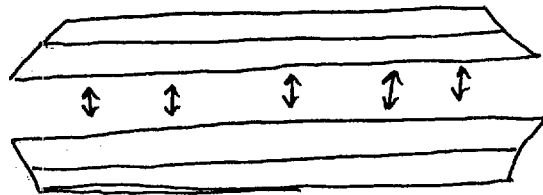

One individual is the target (see sketch); a second is an associate of the target and has closely cropped hair; a third is an Afro-American dressed in a green shirt and "feels" associated with the military; a fourth is a caucasian (nationality unknown) wearing a windbreaker; this guy smacks of being an operative of a well

established intelligence agency; and the fifth individual has a long braid and is of mixed heritage (oriental and latino or middle eastern).

This particular meeting is a "set-up" with a double cross planned by a third party. The "windbreaker" has previous knowledge of this plan.

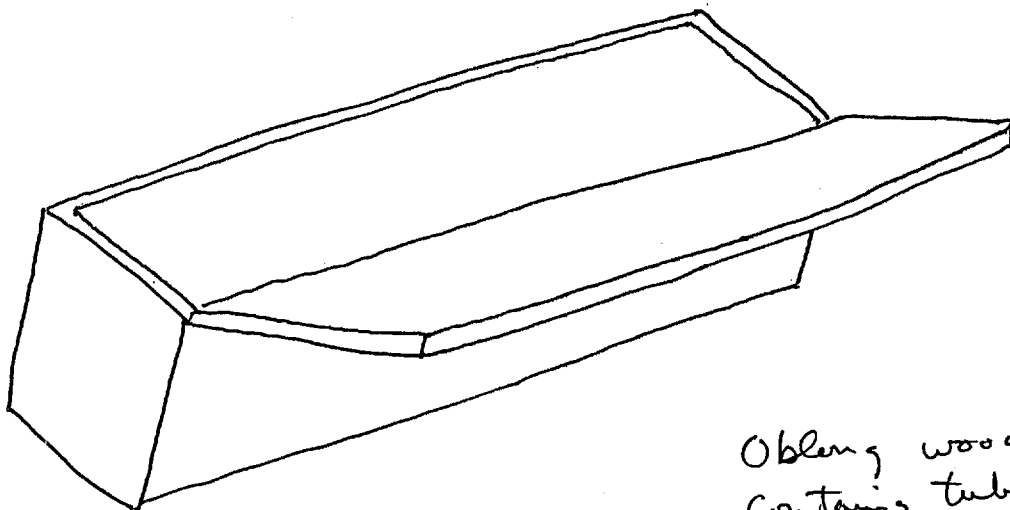

The aircraft depicted in the sketches can only be seen in silhouette. They have been silhouetted by a bright flash from behind. It, or they, sit isolated from other features, including structures. No exterior engines could be discerned and the aircraft sit high above the wheels.
